

# LEG ULCERS...

**...could  
there be  
a deeper  
problem?**

**LEG  
ULCERS  
THINK  
DEEPER**

**...a patient with a leg  
ulcer may have an  
underlying problem.**

A wound to the lower leg will normally heal within 2 weeks. If this is not the case further investigations may be required and your patient should be referred to the local VASCULAR TEAM.
