

Current SLOSS roles

Engagement

Proactive work across South London, London and South East Region helping shape strategy and delivery

Engaging with clinical, operational leads and clinical networks to understand the strategic opportunities

Exploring new partnerships with VCSEs, patient groups and others to improve pathways

Delegation

Ready to take on delegated responsibilities for specialised services and supporting ICBs and wider partners.

Working across London and beyond to met the conditions and assurances for a safe delegation to ICBs from April 2025

Understand and begin to work on further mitigations for risks and issues being inherited in April

Intelligence and Insight

Accessing data and investing in local capacity to develop insight into specialised services.

Analysing patient flows, spend and outcomes, and trends over time

Understanding population need and uncovering health inequalities

Evaluating and learning from our change programmes

Transformation

Testing the case for change through clinical and efficiency pilots

Demonstrating integration - supports system engagement, particularly clinical engagement

Addressing sustainability of services and inequalities of access for our population

Testing cross regional work between South London and Kent, Surrey and Sussex

Network development

Co-commissioning Clinical Networks with NHSE on behalf of our ICBs

Supporting networks and their clinical leaders to maximise their effectiveness and strengthen specialised foundations

Creating greater alignment with ICB/system priorities

Utilising the available transformation resource
